WHAT IS A HEAD SPA?

A Head Spa is a scalp centric, holistic, Japanese approach to hair care that focuses on the health of the scalp. The service begins with a comprehensive scalp analysis followed by an exfoliating scalp detox. You'll also receive an invigorating pressure point scalp massage and a relaxing spa mist for the ultimate scalp facial experience!

WHAT IS HEAD LAB®?

The Malibu C Head Lab® is a series of magnified digital images designed to reveal what is real on your scalp. These close-up images assist you and your stylist in customizing the proper detoxing and maintenance plan, resulting in the ideal environment for optimal hair growth and scalp health.

SCALP ANALYSIS CONSULTATION

Reveal what is real on your scalp with our comprehensive scalp analysis. Watch in real time as your stylist captures magnified images with their digital scope, giving you an up-close-and-personal look at what may be triggering scalp issues and stunting your hair growth.

ESSENTIAL SCALP DETOX

Designed to combat dry, itchy scalp, this essential scalp detox removes impurities, product build-up and other compounds to reveal a refreshed scalp. A deep exfoliation accompanied by a pressure point scalp massage promotes blood circulation while unclogging follicles, creating the ideal environment for optimal hair growth.

SENSITIVE SCALP DETOX

Is your scalp in need of some gentle TLC? This service is for you! Formulated to gently exfoliate and clarify the scalp, this detox will leave your sensitive scalp feeling soothed, replenished, and rejuvenated.

ULTIMATE HEAD SPA

Treat yourself to this indulgent service designed to invigorate and restore your scalp, hair, and soul! The Ultimate Head Spa service encompasses a comprehensive scalp analysis, deep exfoliation, pressure point scalp massage, soothing menthol scalp moisturizer, and a spa mist for a superior, relaxing scalp facial experience!
